## Product News

Dear business partner,

At Rehacare 2022, we presented many interesting new products to our visitors. We are pleased to give you an overview once again here. Your trusted Burmeier representative is available for a discussion at any time.

## The Dali range – new digital and medical possibilities

Our Dali care bed series sets the global standard for safe, comfortable homecare. Now we are taking decisive steps further in the areas of assisted living and medical care.

### MDR-compliant environmental control

From 2023, our Dali BLE will offer a digital interface for integration into environmental controls. The bed can then be adjusted by voice input or eye movement if desired – a quantum leap towards more self-determination for physically impaired users. The interface fully complies with the requirements of the new Medical Device Regulation (MDR).

### Handset selection – flexible at any time

Depending on the requirements, the Dali is available with a wireless or a wired handset. Soon, it will be equipped with a hybrid control unit, which will also allow the retrofitting of a wired handset.

### Trendelenburg handset

For the use of the Dali series in stationary care, a Trendelenburg handset is optionally available for adjusting the Trendelenburg position.

## Safety sides elevation

- Attachable elevation (7 cm) for full-length safety sides
- Can be extended and retracted effortlessly
- No disassembly necessary when not in use

## Mobilisation grip

- Flexible mobilisation aid for attachment to the bed frame
- Can be easily swivelled into the ideal position for standing up or sitting down
- Maintains the mobility of the resident and supports therapy

## Cloud-fit heavy-duty mattress

- 3-layer mattress for decubitus prophylaxis
- Suitable for a body weight of up to 240 kg
- Optimal for our heavy-duty beds Allura II and Gigant

## Bedside table Pleto for our Regia

- Homelike everyday helper for more comfort
- Effortless height adjustment from 69 - 104 cm for meals in bed
- 2-section table top with swivel function for reading
- Available in 4 homelike wood decors

## Regia partner double bed

- Double bed with all the functions of a care bed
- Can be separated into 2 single beds
- Individual configuration options for more protection and homelike design

## Relax bed surround

- Elegant bed surround with clear lines
- Available in 4 homelike wood decors and many sizes
- Can be ideally combined with Lippe bed inserts
- Can be combined to form a double bed

## Lenus – the low-entry bed close to the floor for modern care

- Height adjustment from 15 - 80 cm enables particularly safe positioning of residents at high risk of falling and ergonomic working at the same time
- Optimal e.g. for people with dementia and a high need for fall prophylaxis
- Homelike design with attractive wood decors
