Regia

The individual care bed
with versatile options

International Edition
Regia – the low-height bed for protection, comfort and a homelike feel

When people in need of care live at home, their bed often becomes the focal point of day-to-day living. Sleeping, mealtimes, watching television, having conversations - the care bed is where many activities take place when the user’s state of health or day-to-day condition make it difficult to get up. The bed should therefore create a safe and secure atmosphere through comfort and coziness, promote the mobility of the resident and lighten the burden of caregiving relatives. Our Regia with the innovative Easy Switch system ideally satisfies these requirements.

The Regia is designed with customers in mind who are looking for a care bed that offers many different design options and modern technical support. As a low-height bed with a large height adjustment range, it promotes fall prevention while also enabling back-friendly care. The telescopic split safety side offers an ideal balance between protection and freedom. Thanks to the Easy Switch system, it can be snapped on and off in seconds. This enables the bed to meet changing needs and makes it easy to adapt to new situations.

The Regia offers the option of firmly upholstered headboards, footboards and side panels. A choice of high-quality fabrics or imitation leather and a large selection of elegant wood decors transform the bed into a comfortable designer piece to suit every taste.

Cover: Regia with Primus headboard and Primus-Low footboard in Havana Cherry decor.
A care bed offering great comfort and safety that promotes the mobility of residents, looks good and is easy on the purse - that’s the new Regia in a nutshell. This model provides both private customers and discerning senior residences with a bed that adapts flexibly to changing requirements.

Being a low-height bed with a large height adjustment range of 26 to 80 cm and optional split safety sides, it protects Regia residents from fall injuries without the use of liberty-depriving measures. This follows the philosophy of the Werdenfels approach not to restrict the freedom of those in need of care.

The Regia’s telescopic split safety side (TSG) is easy to raise without any effort. If only the head end is raised, the resident still has ample room to get in and out of bed. Optionally, you can equip the bed with safety sides at the head end only - being 110 cm long, these elements provide standard-compliant protection.

The optional full-length safety side (DSG) can be fitted in seconds using the Easy Click system. With the full-length safety side, residents at risk of falling enjoy maximum protection (image shows an example).

Strong advantages

- Care height of up to 80 cm allows for back-friendly working with the bed
- 225 kg safe working load makes it suitable even for heavy residents
- 100 cm mattress base width and approximately 20 cm bed extension optionally available
- 4-section metal mattress base with electrically adjustable raised leg position
- Selectively lockable handset

Regia

A bed to satisfy discerning tastes

Modern safety sides

External dimensions/height adjustment range:

- Large height adjustment range: 26 cm to 80 cm
- 225 kg safe working load
- 100 cm mattress base width
- 20 cm bed extension optionally available
- 4-section metal mattress base
- Electrically adjustable raised leg position
- Selectively lockable handset

Special features:

- Low-height bed
- Large height adjustment range
- Heavy-duty bed
- Bed extension
- Removable safety sides
- 24 volt system
- Comfort mattress
- Selective lockable handset
- Werdenfels approach

Users at risk of falling are reliably protected by fully raising the safety side.

Users at risk of falling are reliably protected by fully raising the safety side.

Raising the safety side diagonally gives a reassuring feeling of safety.

Raising the safety side at the head end to the second stage offers an ideal balance between freedom and protection, while still meeting the relevant standards.

Raised to the first level at the head end, the telescopic split safety side (TSG) is an orientation aid and enables users to get in and out of bed unassisted.

Raising the safety side at the head end to the second stage offers an ideal balance between freedom and protection, while still meeting the relevant standards.

Raising the safety side diagonally gives a reassuring feeling of safety.

Users at risk of falling are reliably protected by fully raising the safety side.
Choose the Regia with the telescopic split safety side or without a safety side and benefit from our flexible Easy Switch system. The Easy Switch principle is as easy as it is impressive: The safety side elements, the headboard and footboard as well as the side panels can be attached and removed without tools. This is possible thanks to easy-to-use fasteners that snap into place securely and cannot be accidentally opened by the resident. Headboards and footboards from the Nobla series and panels are available as an option with attractive fabric or imitation leather upholstery.

Thanks to the Easy Switch system, the Regia can easily be fitted any time with safety sides or a new look and adapted to your requirements. It becomes a bed that develops with you and supports you in every phase of your life. The removable safety sides are quick to convert to whatever care situation may arise. They also make it considerably easier to assemble the bed.

Replace headboards in seconds whenever required
• Homelike design variants, with optional handle bars
• Attractive wood decors, fabrics and faux leather to choose from
• Headboard, footboard and side panels freely combinable however you wish

Attach or remove split safety sides as required
• Two 90 and 110 cm elements can be freely combined or used separately
• Use of only a 110 cm safety side element at head end provides standard-compliant protection
• Use of only a 90 cm safety side element at head end provides reassurance and orientation and leaves ample space to get in and out of bed

Replacing or removing footboards
• Removable footboard allows better access to the resident, e.g. for foot care
• Choice between a high footboard for a feeling of security or a low footboard for an unobstructed view
• Attractive wood decors, fabrics and faux leather available to choose from

"Safety sides can be freely combined: 110/90 or 90/110"
Low-height beds play an important role in preventing injuries caused by falls. From a position close to the ground, there is only a slight risk for the resident, even if the safety side is not raised. The Werdenfels approach follows the philosophy that liberty depriving measures (DoLS) can be avoided in this way.

With its large height adjustment range of 26 to 80 cm, the Regia satisfies all the requirements of the care sector. The lowest position offers the resident optimal protection in bed. The bed can be easily and intuitively adjusted with the handset. With its 3-stop function, it automatically stops at an intermediate position of around 40 cm - the ideal height for conveniently getting in and out of bed. Raised to the highest position of 80 cm, the Regia enables carers to work ergonomically at hip-level.

Strong advantages
- Large height adjustment range of 26 - 80 cm
- Infinitely variable adjustment with easy-to-operate handset
- Low-height bed promotes fall prevention without the use of deprivation of liberty safeguards
- Ergonomic nursing height protects the back of the carers and relatives and maintains their health
- Ideal entry and exit height promotes the mobility of the resident

The Regia, with its flexible adjustment options, allows residents to participate in day-to-day life on an equal footing with others. Using the handset, the bed can be adjusted to a reverse-Trendelenburg position of up to 15°. When combined with a raised backrest, which can be adjusted to 70°, residents can adopt a comfortable sitting position. People in need of care are able to sit upright without any effort. In this position, nothing stands in the way of a lively conversation or a cozy evening in front of the television. Eating meals is also much easier from a sitting position. At the same time, the risk of aspiration decreases.

The lower leg rest can be raised to a horizontal position with the help of the handset if a raised leg position is required for health reasons.

The automatic intermediate stop at about 40 cm is ideal for many to get in and out of bed. The ergonomic care height of up to 80 cm protects relatives’ backs.

Always the right height

The lowest position of only 26 cm protects against fall injuries.

Comfort

Enjoy everyday life with new vitality

Regia movo

When people can no longer get out of bed very often, a mobile care bed makes everyday life more lively. The Regia movo model is effortless to move, and can easily be manoeuvred into the living room or onto the patio.

- Large 100-mm double castors for easy manoeuvring
- Directional castor facilitates steering
- Height adjustment range 28 - 83 cm
- Central castor locking (standard on all Regia models)

SAFE LIVING AT HOME

The Regia moves people who are no longer able to get out of bed very often to the living room or onto the patio. It is effortlessly manoeuvrable and can easily be manoeuvred into the living room or onto the patio.
Burmeier’s innovative 24-volt drive system provides an ideal safety standard for caring for people at home. All live 230-volt components are banished from the care bed. Incorporated directly in the mains plug unit is the SwitchMode electronic power supply converter. Residents therefore enjoy a high level of safety.

The bed has no current carrying components except when the handset is in use. Power consumption drops by up to 93% as a result. Even more costs and effort are saved by the fact that leakage current measurements, certified by TÜV Rheinland, are no longer necessary. In principle, the required leakage current measurement must be carried out every 2 years for care beds in commercial use. The use of the 24-volt system prolongs this interval so that measurements are not necessary within the expected lifetime of the bed. The applicable lifetime is indicated in the operating instructions.

Even when taking the bed into service, leakage current measurements are unnecessary as these have already been carried out in the factory. It is also not necessary for an electrically trained person to be involved in assembling the bed – this saves the bed operator additional costs.

**24-volt drive system**
The approximately 20 cm **bed extension** is simply inserted into the bed frame. Suitable mattress pieces to extend the mattress are also available.

The **storage tray** for glasses, mobiles or care utensils can be attached to the full-length safety side.

The **document holder** is suitable for medical documents or magazines.

The **comfort mattress base** comprises 50 free-floating spring elements.

The **underbed light** provides better orientation at night and creates additional safety.

The **linen holder** is particularly practical when making beds.

The **liner holder** is particularly practical when making beds.

The **reading lamp** can be selected for insertion into the lifting pole sleeve or for attachment to the lifting pole.

The **underbed light** provides better orientation at night.

The **liner holder** is particularly practical when making beds.

Wall deflection rollers protect the bed and room furnishings while moving or adjusting the height of the bed.

With the flexible **transmitter holder**, the handset is always in the right place.

With the **extension lead**, the handset can be used anywhere in the room.

**Practical accessories**

With original Burmeier accessories, your Regia is transformed into a tailor-made bed offering even greater comfort and protection. The approximately 20 cm **bed extension**, for example, is recommended for very tall residents. This is simply inserted into the bed frame at the foot end. For beds with split safety sides, two 110 cm **long elements** can cover the extended mattress base on request.

Accessories such as the **foam leather cover** for the safety side or the **underbed light** for better orientation at night considerably increase the resident’s safety.

The **comfortable mattress base** with its free-floating elements, the **document holder** or the **linen holder** ensure more comfort and relief in everyday life.

**Fabrics:**
- Light green Tiba 6210
- Orange Elvin 3550
- Red Tiba 3210

**Imitation leather:**
- White J-1142-197
- Anthracite J-1143-395

**Decors**
- Havana Cherry
- Lindberg Oak
- Natural Beech
- Royal Maple
- Real Cherry

**Headboards/footboards**
- Primus closed-surface headboard, with a handle bar at the foot end (wood decors only)
- Primus headboard, Primus Low footboard (wood decors only)
- Nobla (upholstered only)
- Nobla headboard, Nobla reha footboard (padded only)
- Prinzino with handle bar (wood decors only)

Custodians of values
Shapers of the future

STIEGELMEYERGROUP

Custodians of values
Our company was founded in Herford in 1900 and is still a family-run enterprise today. Respect and a sense of responsibility towards our customers, employees and partners form the basis for our day-to-day work. Based on these values and our many years of experience, we offer our customers all over the world high-quality products, solutions and services to meet the needs of the care and healthcare sectors.

Shapers of the future
In order to cope with rapid changes in the care and healthcare sectors, we develop all our products ourselves. Creating innovations and visions of what care will be like in future are the goals we pursue. We maintain regular contact with our customers in order to support them in their daily tasks. Implementing tomorrow’s trends today is a successful tradition of ours.

Our expertise

- Hospital
- Nursing home
- Homecare
- Lifestyle beds
- Furniture systems
- Service

The Stiegelmeyer-Group is your international partner for hospitals and care facilities and, with the Burmeier brand, also for home care. We support our customers with practical products, solutions and services, which we constantly develop further.

- Founded in 1900 and still family-run today
- Employs 1,100 members of staff worldwide
- Production of all core products in our own factories
- Product development and manufacture in Germany
- Services, training and process optimisation at the customer’s site
- International certification and export to more than 60 countries
- Sales companies in Belgium, Finland, France, the Netherlands, Poland and South Africa
