Regia

The individual care bed with versatile options

International Edition
Regia – the low-height bed for protection, comfort and a homelike feel

When people in need of care live at home, their bed often becomes the focal point of day-to-day living. Sleeping, mealtimes, watching television, having conversations – the care bed is where many activities take place when the user’s state of health or day-to-day condition make it difficult to get up. The bed should therefore create a safe and secure atmosphere through comfort and cosiness, promote the mobility of the resident and lighten the burden of caregiving relatives. Our Regia with the innovative Easy Switch system ideally satisfies these requirements.

The Regia is designed with customers in mind who are looking for a care bed that offers many different design options and modern technical support. As a low-height bed with a large height adjustment range, it promotes fall prevention while also enabling back-friendly care. The telescopic split safety side offers an ideal balance between protection and freedom. Thanks to the Easy Switch system, it can be snapped on and off in seconds. This enables the bed to meet changing needs and makes it easy to adapt to new situations. With the Regia partner double bed, couples can enjoy harmonious hours for two again.

The Regia offers the option of firmly upholstered headboards, footboards and side panels. A choice of high-quality fabrics or imitation leather and a large selection of elegant wood decors transform the bed into a comfortable designer piece to suit every taste.

Vibrant fabrics

Headboards and footboards are available with attractive upholstered fabrics. Where split safety side elements have not been included, you can also use panels in a wood, fabric or leather look. In this way, the bed fits every style of home design.

Stylish imitation leather

If the Regia is covered all round with stylish imitation leather, it no longer looks like a care bed. Users nevertheless enjoy all the advantages of an electrically adjustable bed. Safety sides or elements in a different look can be retrofitted at any time. This lets the bed change to keep pace with your requirements.

Regia partner double bed

• Flexible senior bed for couples:
  – Individually adjustable mattress base rests
  – Comfortable sitting position
  – The two halves of the bed can easily be separated and put back together again
  – Attractive appearance

Cover: Regia with Primus headboard and Primus-Low footboard in Havana Cherry decor.

• Large height adjustment range:
  26 – 80 cm

• High safe working load:
  225 kg

• Individually adjustable:
  – Mattress base width 90 or 100 cm
  – Telescopic split safety side for flexible protection
  – Easy Switch for quick no-tool assembly of safety sides, headboard, footboard and panels

A care bed offering great comfort and safety that promotes the mobility of residents, looks good and is easy on the purse - that’s the new Regia in a nutshell. This model provides both private customers and discerning senior residences with a bed that adapts flexibly to changing requirements.

Being a low-height bed with a large height adjustment range of 26 to 80 cm and optional split safety sides, it protects Regia residents from fall injuries without the use of liberty-depriving measures. This follows the philosophy of the Werdenfels approach not to restrict the freedom of those in need of care.

A bed to satisfy discerning tastes

Strong advantages

• Care height of up to 80 cm allows for back-friendly working with the bed
• 225 kg safe working load makes it suitable even for heavy residents
• 100 cm mattress base width and approximately 20 cm bed extension optionally available
• 4-section metal mattress base with electrically adjustable raised leg position
• Selectively lockable handset

Special features:

Low-height bed 26 – 80 cm
Large height adjustment range 26 – 80 cm
High safe working load 225 kg
Bed extension
Removable side panels
24 volt system
Comfort control
Kneeling mechanism
Manual release
Handset

External dimensions/height adjustment range:

Regia

Increasing unsteadiness and a growing need for care in older age presents many challenges for couples. One of these concerns the question of a shared bed. Often, one partner moves into a care bed while the other remains alone in the double bed. The familiarity and intimacy of the relationship suffers as a result. Our Regia partner double bed offers an ideal solution in this case.

The Regia partner combines the care-giving strengths and comfort of a single bed with safety features specially designed for couples. At the same time, the two halves can easily be separated and rejoined if necessary to provide care at the bedside, or if the partners wish to sleep in separate rooms for a while.

Regia partner

Increasing unsteadiness and a growing need for care in older age presents many challenges for couples. One of these concerns the question of a shared bed. Often, one partner moves into a care bed while the other remains alone in the double bed. The familiarity and intimacy of the relationship suffers as a result. Our Regia partner double bed offers an ideal solution in this case.

The Regia partner combines the care-giving strengths and comfort of a single bed with safety features specially designed for couples. At the same time, the two halves can easily be separated and rejoined if necessary to provide care at the bedside, or if the partners wish to sleep in separate rooms for a while.

Strong advantages

• Large height adjustment range of 26 – 80 cm
• Two mattress bases measuring 90 x 200 cm each
• Safe working load of 225 kg per mattress base
• Backrest and leg rests on the mattress bases individually adjustable
• Height adjustment and a reverse-Trendelenburg position of the bed corpus are always synchronous, so do not pose a pinching hazard for users
• Bed frame surrounds and safety sides can be flexibly adapted with the Easy Switch system

Special features:

Low-height bed 26 – 80 cm
Large height adjustment range 26 – 80 cm
High safe working load 2x225 kg
Bed extension
Removable side panels
2x24 volt system
Comfort control
Kneeling mechanism
Manual release
Handset

External dimensions/height adjustment range:

Regia partner double bed
The Regia’s telescopic split safety side (TSG) is easy to raise without any effort. If only the head end is raised, the resident still has ample room to get in and out of bed. Optionally, you can equip the bed with safety sides at the head end only - being 110 cm long, these elements provide standard-compliant protection.

The telescopic safety side (TSG) is easy to raise in two stages. Raised to the first level, it offers the resident orientation and is so discreet that the eye can wander unhindered into the room. The second level provides full protection. For a reassuring feeling of support and safety, it is also helpful to raise the bars to a diagonal position.

All elements of the telescopic safety side (TSG), as well as the side panels and headboard and footboard, can be attached and removed in just a few easy steps - this is made possible by the innovative Easy Switch system. In this way, the Regia adapts to every need and promotes the mobility of the person being cared for.

The optional full-length safety side (DSG) is recommended for residents with a high risk of falling and where thick anti-decubitus mattresses are used. It is also effortless to attach and remove - with the Easy Click system.

Modern safety sides

The Regia partner provides individual comfort and protection for the two users, and also reduces the burden on carers. The backrest and leg rests on the two mattress bases can be adjusted independently of each other, so one person can read, for example, while the other is asleep. Each half of the bed has its own handset for this purpose.

The corpus of the bed, on the other hand, always moves synchronously within its large height adjustment range of 26 to 80 cm and when it tilts to a reverse-Trendelenburg position. This prevents trapping hazards for users that could otherwise occur due to gaps opening up between the mattress bases. Optional split safety sides for customised safety can be retrofitted at any time.

Users at risk of falling are reliably protected by fully raising the safety side.

Electrically adjustable double beds are often little more than single beds placed next to each other but offering few functional options. The Regia partner, however, will convince you otherwise as it can tilt to provide a comfortable sitting position. This facilitates breathing as well as taking meals in bed, and promotes an active everyday life at eye level with other people.

While the corpus of the bed always moves synchronously, the mattress bases can be adjusted individually. This makes it possible, for example, to set the bed to a comfortable sitting position.

While the full-length safety side, residents at risk of falling enjoy maximum protection (image shows an example).

SAFE LIVING AT HOME

Comfort and safety for couples

The easy separation of the two halves of the bed facilitates bedside care and makes it easier to clean the room.

Sitting position

Electrically adjustable double beds are often little more than single beds placed next to each other but offering few functional options. The Regia partner, however, will convince you otherwise as it can tilt to provide a comfortable sitting position. This facilitates breathing as well as taking meals in bed, and promotes an active everyday life at eye level with other people.

The Regia partner provides individual comfort and protection for the two users, and also reduces the burden on carers. The backrest and leg rests on the two mattress bases can be adjusted independently of each other, so one person can read, for example, while the other is asleep. Each half of the bed has its own handset for this purpose.

The corpus of the bed, on the other hand, always moves synchronously within its large height adjustment range of 26 to 80 cm and when it tilts to a reverse-Trendelenburg position. This prevents trapping hazards for users that could otherwise occur due to gaps opening up between the mattress bases. Optional split safety sides for customised safety can be retrofitted at any time.
Choose the Regia with the telescopic split safety side or without a safety side and benefit from our flexible Easy Switch system. The Easy Switch principle is as easy as it is impressive: The safety side elements, the headboard and footboard as well as the side panels can be attached and removed without tools. This is possible thanks to easy-to-use fasteners that snap into place securely and cannot be accidentally opened by the resident. Headboards and footboards from the Nobla series and panels are available as an option with attractive fabric or imitation leather upholstery.

Thanks to the Easy Switch system, the Regia can easily be fitted any time with safety sides or a new look and adapted to your requirements. It becomes a bed that develops with you and supports you in every phase of your life. The removable safety sides are quick to convert to whatever care situation may arise. They also make it considerably easier to assemble the bed.

The patented system for adaptable care beds with standard-compliant safety

Replacing or removing footboards
• Removable footboard allows better access to the resident, e.g. for foot care
• Choice between a high footboard for a feeling of security or a low footboard for an unobstructed view
• Attractive wood decors, fabrics and faux leather available to choose from

Replace headboards in seconds whenever required
• Homelike design variants, with optional handle bars
• Attractive wood decors, fabrics and faux leather to choose from
• Headboard, footboard and side panels freely combinable however you wish

Attaching or removing split safety sides as required
• Two 90 and 110 cm elements can be freely combined or used separately
• Use of only a 110 cm safety side element at head end provides standard-compliant protection
• Use of only a 90 cm safety side element at head end provides reassurance and orientation and leaves ample space to get in and out of bed
The lowest position of only 26 cm protects against fall injuries. Low-height beds play an important role in preventing injuries caused by falls. From a position close to the ground, there is only a slight risk for the resident, even if the safety side is not raised. The Werdenfels approach follows the philosophy that liberty depriving measures (DoLS) can be avoided in this way.

With its large height adjustment range of 26 – 80 cm, the Regia satisfies all the requirements of the care sector. The lowest position offers the resident optimal protection in bed. The bed can be easily and intuitively adjusted with the handset. With its 3-stop function, it automatically stops at an intermediate position of around 40 cm – the ideal height for conveniently getting in and out of bed. Raised to the highest position of 80 cm, the Regia enables carers to work ergonomically at hip-level.

Always the right height

**Strong advantages**

- Large height adjustment range of 26 – 80 cm
- Infinitely variable adjustment with easy-to-operate handset
- Low-height bed promotes fall prevention without the use of deprivation of liberty safeguards
- Ergonomic nursing height protects the back of the carers and relatives and maintains their health
- Ideal entry and exit height promotes the mobility of the resident

The Regia, with its flexible adjustment options, allows residents to participate in day-to-day life on an equal footing with others. Using the handset, the bed can be adjusted to a reverse-Trendelenburg position of up to 15°. When combined with a raised backrest, which can be adjusted to 70°, residents can adopt a comfortable sitting position. People in need of care are able to sit upright without any effort. In this position, nothing stands in the way of a lively conversation or a cozy evening in front of the television. Eating meals is also much easier from a sitting position. At the same time, the risk of aspiration decreases.

The lower leg rest can be raised to a horizontal position with the help of the handset if a raised leg position is required for health reasons.

**SAFE LIVING AT HOME**

Regia movo

When people can no longer get out of bed very often, a mobile care bed makes everyday life more lively. The Regia movo model is effortless to move, and can easily be manoeuvred into the living room or onto the patio.

- Large 100-mm double castors for easy manoeuvring
- Directional castor facilitates steering
- Height adjustment range 28 - 83 cm
- Central castor locking (standard on all Regia models)
The Regia low-height bed protects against falls without restricting the freedom and comfort of residents.

Burmeier’s innovative 24-volt drive system provides an ideal safety standard for caring for people at home. All live 230-volt components are banished from the care bed. Incorporated directly in the mains plug unit is the SwitchMode electronic power supply converter. Residents therefore enjoy a high level of safety.

The bed has no current carrying components except when the handset is in use. Power consumption drops by up to 93% as a result. Even more costs and effort are saved by the fact that leakage current measurements, certified by TÜV Rheinland, are no longer necessary. In principle, the required leakage current measurement must be carried out every 2 years for care beds in commercial use. The use of the 24-volt system prolongs this interval so that measurements are not necessary within the expected lifetime of the bed. The applicable lifetime is indicated in the operating instructions.

Even when taking the bed into service, leakage current measurements are unnecessary as these have already been carried out in the factory. It is also not necessary for an electrically trained person to be involved in assembling the bed – this saves the bed operator additional costs.

Its SwitchMode power supply unit produces a 24-volt safety extra-low voltage directly at the socket.

24-volt drive system

SAFE LIVING AT HOME
Energy saving

- Up to 93% less electricity consumption*

SAFE LIVING AT HOME
Strong advantages

- Safety extra-low voltage starting from the transformer at the power socket
- No 230-volt components on the bed
- No leakage current measurements are necessary after installation or throughout the entire expected service life of the bed
- A test certificate can be downloaded for every bed

* Compared to 230-volt systems, assuming approx. 5 adjustments per day

Energy saving

- Compared to 230-volt systems, assuming approx. 5 adjustments per day
Our Regia is a bed that can be operated intuitively without lengthy explanations. However, questions about the bed or requests for accessories may crop up during day-to-day care. In this case, the Burmeier app is an ideal helper. This free app is aimed at specialist dealers, caring relatives and people in need of care.

With the app’s bed finder you can find the Burmeier model you are looking for in a matter of minutes. You can also find operating instructions and watch helpful videos there. Use the “accessories” tile to find attractive additional equipment for your bed, such as a tray or a cozy reading lamp. Make your choice and order the product from your nearest specialist dealer, who you can find equally quickly using the “dealer search” tile.

The digital helper for your bed

SAFE LIVING AT HOME

Strong advantages

- For use with Apple and Android smartphones
- Quick access to plenty of important information and answers about all Burmeier products
- Practical dealer search
- Easy access to our social media channels and our FORUM customer magazine, with interesting news from the world of health and care

The Sky-fit premium mattress (shown here without cover) adapts perfectly to the Regia’s mattress base.

The digital helper for your bed

Mattresses

Enjoy a good night’s sleep

Treat yourself or your loved one to even more comfort by choosing a Burmeier mattress for your Regia. Our care bed mattresses precisely follow any adjustments to the backrest and thigh rest, and thereby allow health-promoting lying positions to unfold their full benefit. The Sky-fit and Comfort-fit models are also reversible mattresses with one smooth and one cutout side. As a result, these mattresses are never “too hard” or “too soft” – they can simply be turned over and offer two different lying experiences.

Sky-fit – the premium model

- High-quality dual-layer mattress with a 2 cm Skytherm® top layer and a 12 cm cold foam base layer
- Cutouts in the base layer ensure optimum adaptation to the mattress base
- Both sides can be used as lying surfaces
- Reinforced edge zones allow users to sit comfortably on the side of the bed
- Removable reversible cover, one side polyurethane (PU), the other side polyester and viscose, can be washed in a commercial washing machine
- Compression hardness 5.0 kPa (edge zones), 4.0 kPa (base layer), 2.5 kPa (top layer), density 50 kg/m³ (base layer), 40 kg/m³ (top layer)

Comfort-fit – the mid-range mattress

- The comfortable mattress with a core made of elastic polyurethane cold foam (14 cm)
- Cutouts in the base layer ensure optimum adaptation to the mattress base
- Both sides can be used as lying surfaces
- Reinforced edges protect against rolling out of bed
- Removable reversible cover, one side polyurethane (PU), the other side polyester and viscose, can be washed in a commercial washing machine
- Compression hardness 5.0 kPa (edge zones), 4.0 kPa (base layer), density 40 kg/m³

Basic-fit – the entry-level model

- Single layer mattress made of comfortable polyurethane (12 cm)
- White removable PU cover, can be washed in a commercial washing machine
- Compression hardness 4.5 kPa, density 40 kg/m³

Available for mattress base dimensions:

Sky-fit
90 x 200 cm
100 x 200 cm

Comfort-fit
90 x 200 cm
100 x 200 cm

Basic-fit
90 x 200 cm
90 x 220 cm
100 x 200 cm
100 x 220 cm

The Sky-fit premium mattress (shown here without cover) adapts perfectly to the Regia’s mattress base.

Practical accessories

With original Burmeier accessories, your Regia is transformed into a tailor-made bed offering even greater comfort and protection. The approximately 20 cm bed extension, for example, is recommended for very tall residents. This is simply inserted into the bed frame at the foot end. For beds with split safety sides, two 110 cm long elements can cover the extended mattress base on request.

Accessories such as the foam leather cover for the safety side or the underbed light for better orientation at night considerably increase the resident’s safety. The comfortable mattress base with its free-floating elements, the document holder or the linen holder ensure more comfort and relief in everyday life.

Fabrics:
- Light green Tiba 6210
- Red Tiba 3210

Imitation leather:
- White 1-1142-197
- Anthracite 1-1142-395

Decors:
- Havana Cherry
- Lindberg Oak
- Natural Beech
- Royal Maple
- Real Cherry

Regia partner: Natural Beech and Havana Cherry

Headboards/footboards:
- Primus closed-surface headboard, with a handle bar at the foot end (wood decors only)
- Primus headboard, Primus-Low footboard (wood decors only)
- Nobla (wood decor or upholstered, longer delivery)
- Nobla headboard, Nobla reha footboard (wood decor or upholstered)
- Prinzino (wood decors only, longer delivery)

Regia partner: only available with the combination Nobla or Nobla mala, wood decor or upholstered
### Custodians of values

Our company was founded in Herford in 1900 and is still a family-run enterprise today. Respect and a sense of responsibility towards our customers, employees and partners form the basis for our day-to-day work. Based on these values and our many years of experience, we offer our customers all over the world high-quality products, solutions and services to meet the needs of the care and healthcare sectors.

### Shapers of the future

In order to cope with rapid changes in the care and healthcare sectors, we develop all our products ourselves. Creating innovations and visions of what care will be like in future are the goals we pursue. We maintain regular contact with our customers in order to support them in their daily tasks. Implementing tomorrow’s trends today is a successful tradition of ours.

### STIEGELMEYER GROUP

The Stiegelmeyer-Group is your international partner for hospitals and care facilities and, with the Burmeier brand, also for home care. We support our customers with practical products, solutions and services, which we constantly develop further.

- Founded in 1900 and still family-run today
- Employs 1,100 members of staff worldwide
- Production of all core products in our own factories
- Product development and manufacture in Germany
- Services, training and process optimisation at the customer’s site
- International certification and export to more than 60 countries
- Sales companies in Belgium, Finland, France, the Netherlands, Poland and South Africa
