SAFE LIVING AT HOME

Beds and furniture for care at home

International edition

Subject to technical changes without notice. The shown product colours may differ slightly from the actual product. Last updated 03/2022. Version 08. Item no. 601395.

Burmeier – safe living at home

‘Safe living at home’ – this is the philosophy that characterises Burmeier products. The company, with its roots in Hiddenhausen in Westphalia, is the market leader in the home care sector in Germany. The technically innovative and durable products enjoy a worldwide reputation.

Burmeier has been another successful subsidiary of the Stieglmeyer Group in its current form since 1995. Product development always focuses on the concept of making life at home as pleasant as possible for people in need of care and making work easier for care-giving relatives.

Attractive design, modern safety side systems and prompt availability of the products are key arguments for retailers and private customers. The Burmeier 24-volt drive system does not require any further leakage current measurements during the expected service life of the bed and beyond. All this saves costs and helps to ensure that the products offer excellent value for money.

In Burmeier’s safe, comfortable beds you or your customers will feel very comfortable.

Care beds
